

This is a Test

January 2010 - Data Processing has been busy rethinking the towns website. For the last few months we have been asking town hall staff, board and committee members and town citizens their opinions on what improvements can be made. Surveys were the main method of collection and we are happy that over 60 people weighed in. A copy of the survey results are available for the public to view.

Thanks to your input we are working to increase the amount of information the town offers on the webpage and improve the organization of it. To this end, all town departments will be posting updates such as this, giving the residents we serve more access to what goes on in government. We will be expanding our web resources for businesses and residents. Look for expanded e-pay, better web search and more information from community boards and committees too!
