To: Aaron Shaheen <AShaheen@wareham.ma.us>;

Hello,

I am one of the concerned residents of the fearing hill area as well as a member of the mashpee wampanoag tribe. From the moment I heard about the plan to put in another solar farm I was deeply concerned and honestly disappointed. There is already 2 near buy and so far we haven't seen any cuts in our bills . The only thing the community has gained is loss of beauty woods and disruptive construction.

This solar farm brings absolutely no benefit to the town or even the environment at this point . It is ripping habitat for our wildlife, using resources that are very taxing on the earth to make panels that don't even last 5 year. There has also been recorded instances of land owners having to alter their plans because it obstructs an ancient way ; which are protected.

All potential pros of this going in hold no ground , the citizens have no gain , the waste made out ways the new energy produced. As well that land will effect the protected wetlands that could be observed by one not even 3/4 mile from this one.

Separately I would like say this is not about save the planet it is about monetary gain of the already rich. It is about everything wrong with capitalism. It pains me to see my lands used for such things.

Ms. Deets
