A portion of the proposed project falls within the buffer zone to Bordering Vegetated Wetland on this site. Therefore, a Notice of Intent would be required to be filed with the Conservation Commission for this project so that the Commission can determine whether or not the project meets the requirements of the applicable wetland laws. This would involve a separate public hearing before the Conservation Commission. Thus far, a Notice of Intent has not been submitted to the Conservation Office for this project. Please contact me with any further questions. Thanks.
