Re: Squirrel Island Road

Dear Mr. Buckland,

This letter is in response to Mr. Rowley's review of the subdivision plan for, Dos Amigos Realty, LLC, Squirrel Island Road.

- *4. Sheet 4 shows the proposed road profile and plan construction. The pavement width proposed is 12 feet. A simple hammerhead type turnaround is proposed instead of a circular pavement.*
- *4a. It is recommended that the pavement be made 18 feet as required by Section VI, C of the Rules and Regulations. Two-way traffic cannot safely travel on a 12-foot-wide pavement.*

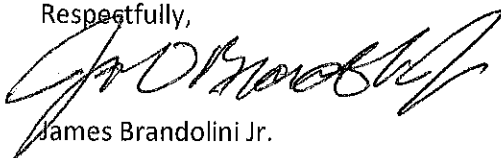

Response: It is recommended that the proposed road be a paved surface of eighteen feet in width with cape cod berms as Mr. Rowley's comments recommended.

- *4b. The fire apparatus backing movement shown on Sheet 5 of the plans shows that it takes up all of the available space for the limited turning area. It is recommended that along with widening the travel surface, that this turning area be made longer. In the event the new Tower needs to gain access, it will be difficult to make appropriate movements.*

Response: The Swept Path Analysis provided was completed using the appropriate vehicle's (Tower 1) specifications. The recommended increase in road width would allow for easier access.

Please contact me with any questions regarding this matter. 508-295-2973

Respectfully,

James Brandolini Jr.  
Captain Fire Prevention
