

Questions submitted for the Pump Stations check bid answers 6/29/2022

- On page 2 there is a pricing reference to “Baffler”, What is Baffler? **On Page 24-This is a typo – please remove from “OR” on.**
- The Scope of Services describes Pump Station inspections. The bid sheet only references “per hour” rates. Should there not be a line item for inspections (including the report writing). **The hourly rates on the pricing sheet is what is needed.**
- Should the lump sum pump station inspection be all inclusive for each station? **No**
- Do we need to put lump sum costs for 20 HR of inspections and two days of mechanical/electrical service? Will it be billed monthly? **The hourly rates cover this. Monthly billing is ok but we prefer weekly with the report .**
- Does the flow meter inspection need to be separated out to a lump sum assuming 36 Hr? **It states “as needed” and can be addressed between the contractor and owner.**
- Also this calls for 3 years. There should be bid forms for years 2 and 3. There is no page for escalating rates? **It will be addressed in the contract as each year, pricing has to be mutually agreed upon.**
- The Scope of Services calls for annual valve inspections. Should there be a bid item for that service? **This is as needed systemically and can be discussed between contract and owner**
