

ZBA members,

The Onset Water Department has general procedures for reviewing all proposed projects that include a water main extension. These procedures are independent of the reviews conducted by the Wareham Planning Board and Zoning Board of Appeals. The Settler's Glen project proponents have not submitted plans that meet the requirements of water department and its Board of Water Commissioners. The water department will complete its review of the project when the proponent meets our requirements. If the project is approved, then the water department will provide the proponents with a letter that includes, among other things, the fees associated with the project.

Please feel free to reference Onset Water Dept.'s construction specifications, located at our district webpage, link is provided below.

Thank you,

David Candeias

Superintendent Onset Water Dept.

508-295-0603
